Well done J and R for putting this together. I think this helps to demonstrate that we are collective on moving the curriculum forward, each with our part to play.

I will get back to you tomorrow re some ideas around the two options; though in the meantime do support the idea of not referring to this as a “debate”, instead refer to it as a “discussion”.

As an aside- I have also been recently informed that our programme provides “optional papers” rather than “elective”. Optional refers to us having a specific list of papers that the students can choose from (which we do); whereas elective means they can choose anything across the University...

Will be in touch again tomorrow.

Regards,

Todd Stretton

Subject: For all staff: Research paper options

Mondays staff meeting will include some discussion around the options for research papers within the undergraduate curriculum. As a committee we were tasked to consider some options and come up with recommendations to put to the staff meeting. Todd has put together a video which we would appreciate you watching – found here:

<https://www.youtube.com/watch?v=C7Ph3MFaR3E&feature=youtu.be>

The options which we will discuss on Monday are :

1. A 15pt compulsory research paper in Year 3 Sem 2
2. A 15pt elective research paper in Year 3 Sem 2

We would appreciate you giving some thought to both of these options before you attend the meeting on Monday where we will discuss the pros and cons of both approaches before moving forwards with one of these.

Many thanks

J R and R E
